Android Style Guide

Blog posts. Styles and themes on Android allow you to separate the details of your app design from the UI structure and behavior, similar to stylesheets in web design. A style is a collection of attributes that specify the appearance for a single View . A style can specify attributes such as font color, font size, background color, and much more. A theme is a collection of attributes that's applied to an entire app, activity, or view hierarchy—not just an individual view.

The HIDL code style resembles C++ code in the Android framework, with 4-space indents and mixed-case filenames. Package declarations, imports, and docstrings are similar to those in Java, with slight modifications. The following examples for Foo.hal and types.hal illustrate HIDL code styles and provide quick links to details on each style (FooClientCallback.hal, IBar.hal, and IBaz.hal have been omitted).

Code Style Guide | Android Open Source Project

The guide is a reference document. Instead of reading through it in linear order, you can use it to look up specific issues as needed. If you're new to the style guide and want to get a general...

Android should always be capitalized and is never plural or possessive. "Android", or anything confusingly similar to "Android", cannot be used in names of applications or accessory products, including phones, tablets, TVs, speakers, headphones, watches, and other devices. Instead, use "for Android".

Brand guidelines | Google Play | Android Developers

Design for Android Android users expect your app to look and behave in a way that's consistent with the platform. Not only should you follow material design guidelines for visual and navigation patterns, but you should also follow quality guidelines for compatibility, performance, security, and more.

Android Developers

Dark theme applies to both the Android system UI and apps running on the device. There are three ways to enable Dark theme in Android 10 (API level 29) and higher: Use the system setting (Settings -> Display -> Theme) to enable Dark theme. Use the Quick Settings tile to switch themes from the notification tray (once enabled).
