In Lessons 2 and Lesson 3 you learned about describing data. We have stressed the importance of being able to distinguish between categorical and quantitative variables. The summary statistics that you compute and the visual representations that you create are dependent on the number and types of variables that you are working with.

3.6 - Lesson 3 Summary | STAT 200

Starting with Moodle 1.6, there are two different student answer analysis systems available for the Short Answer type of question in the Lesson Module: the simple system and the new regular expressions system. The simple system is the default and is the same used by the Quiz Module.
