NEMI Method Summary - 5310B

Standard Methods for the Examination of Water and Wastewater was first published in 1905. Since that time, and through 20 editions, Standard Methods has included hundreds of analytical techniques for the determination of water quality.

Standard Methods

Abstract: 9215 A. Introduction 1. Applications. The heterotrophic plate count (HPC), formerly known as the standard plate count, is a procedure for estimating the number of live, culturable heterotrophic bacteria in water and for measuring changes in swimming pools or during water treatment and distribution. Colonies may arise from pairs, chains, clusters, or single cells—all of which are ...
