- Information systems engineers will be focusing more on fine-tuning and perfecting these automated software engineering systems and software agents - Most business systems requirements analysis and design can be carried out by end-users, with information systems engineers serving as consultants and advisors

### Systems Analysis & Design - EuroSymposium

The XIIIth EuroSymposium has the objective of promoting and developing high quality research on all issues related to Information Systems (IS). It provides a forum to researchers and practitioners in IS in Europe and beyond - to interact, collaborate and develop the IS areas. The EuroSymposium is currently headed by the Advisory Board, consisting of prominent IS researchers to guide this initiative.

Preface. Systems Analysis and Design (SAND) is an evolving field that still represents the point where business and technology intersects. As discussed in (Bajaj, Batra, Hevner, Parsons, & Siau, 2005), SAND represents the core of Management Information Systems (MIS) curricula but is underrepresented in the area of MIS research.

Systems analysis is an iterative process that continues until a preferred and acceptable solution emerges. (e)System Design Based on the user requirements and the detailed analysis of the existing system, the new system must be designed. This is the phase of system designing. It is the most crucial phase in the develop- ments of a system.
