Read Print is an online library where you can find thousands of free books to read. The books are classics or Creative Commons licensed and include everything from nonfiction and essays to fiction, plays, and poetry. Free registration at Read Print gives you the ability to track what you've read and what you would like to read, write reviews of books you have read, add books to your favorites, and to join online book clubs or discussion lists to discuss great works of literature.

### The Codesys Visualization Ifm

A visualization is a graphical representation of the project variables which allows inputs to the PLC program in online mode via mouse and keypad. The CoDeSys visualization editor, which is part of the programming system provides graphic elements which can be arranged as desired and can be connected with project variables.
